SUMMARYSenior Full-Stack AI Engineer with 5+ years of experience building scalable generative AI web applications. Proven expertise integrating Gemini API, FastAPI, Python, PostgreSQL, and Streamlit.

SKILLS- Languages: Python, JavaScript, TypeScript, SQL
- Frameworks & Tools: FastAPI, Streamlit, Docker, PostgreSQL, React, Pydantic
- AI & Machine Learning: Google GenAI SDK (Gemini), Prompt Engineering, Structured Outputs, LangChain
- Cloud & DevOps: GCP, Cloud Run, Docker, Git CI/CD

EXPERIENCELead AI Engineer | Apex Cloud Solutions (2022 - Present)
- Architected end-to-end document processing pipelines using Gemini API and Pydantic structured schemas.
- Built high-throughput microservices using FastAPI and PostgreSQL handling 2M+ daily requests.
- Developed internal recruiter screening tools using Streamlit and Docker on Google Cloud Platform.

Full-Stack Developer | InnovateTech Labs (2019 - 2022)
- Developed responsive web frontends with React and robust RESTful APIs in Python.
- Implemented automated CI/CD pipelines reducing deployment friction by 40%.

EDUCATIONB.S. in Computer Science | University of California, Berkeley
